PROFESSIONAL SUMMARY

Software engineer with three years of professional experience developing React and React Native applications at Ally Financial. Production background includes component architecture and state management (Zustand, XState, TanStack React Query), headless CMS integration with Contentful, feature flagging through LaunchDarkly, and cross-platform UI delivery across mobile and web surfaces. Daily user of AI coding agent tools including Codex, Claude Code, and OpenCode.

WORK EXPERIENCE

Brooksource

Software Engineer (Contract with Ally Financial)

Charlotte, NC

2023 - Present

- Built the Welcome experience for Ally's mobile banking app (an Instagram-stories-style onboarding carousel) using XState for state-machine modeling, later refactored to Zustand. Data layer evolved from GraphQL to TanStack React Query against Contentful.
- Built the Explore Products and Rates feature, shipped to both the mobile banking app and a microfrontend on Ally's website, with TanStack React Query handling Contentful data for cross-platform reach.
- Integrated LaunchDarkly to feature-flag both features across mobile and web surfaces, enabling progressive rollout and instant revert capabilities.
- Migrated an existing Ally web application from Create React App to Vite, modernizing build tooling.
- Made targeted changes in Swift and Kotlin native modules of Ally's brownfield React Native app when JS-side work required native bridging.
- Developed and maintained reusable UI components in React, React Native, and TypeScript across 5+ enterprise applications. Improved accessibility compliance (WCAG 2.1) on customer-facing surfaces.

PROJECTS

AI-Powered Text-to-Speech for the Visually Impaired - OCR pipeline using convolutional neural networks, converting over 85% of handwritten text into speech.

Personal Portfolio (philliphirsch.com) - Astro, Tailwind CSS, deployed on Vercel.

EDUCATION

MS Computer Science, UNC Charlotte (2022)

BS Computer Science, UNC Charlotte (2021)

SKILLS

Languages	TypeScript, JavaScript, Python, Swift, Kotlin
Frontend	React, React Native, Astro, Tailwind CSS, Vite, React Router, React Navigation, React Reanimated, Zustand, TanStack React Query, XState, LaunchDarkly
Data & API	GraphQL, REST APIs, Contentful (headless CMS)
Testing	Jest, Cypress
CI/CD	GitHub Actions, Docker, Vercel, Netlify, Cloudflare
Monitoring	Dynatrace
AI Tools	Claude Code, Codex, OpenCode, Pi
